# Company Overview

HAVA – Hub for Agricultural Value Addition is an agro-based enterprise dedicated to transforming locally sourced agricultural produce into high-quality, value-added products. Rooted in sustainability and community empowerment, HAVA focuses on harnessing the potential of natural crops such as Moringa, Neem, and Hibiscus, known for their nutritional, medicinal, and economic value.

Our core mission is to create impactful agricultural solutions that benefit not just our business, but also our surrounding communities. We work hand-in-hand with smallholder outgrower farms within our community to ensure a sustainable supply chain that uplifts livelihoods and strengthens local economies.

# Community-Based Outgrower System

HAVA operates a unique outgrower model, partnering with smallholder farmers in our immediate community. We provide training, inputs, and support to ensure high-quality crop cultivation, and in return, we offer a reliable market and fair prices for their harvests.

This model provides benefits of:

- Enhancing income for rural farmers
- Promoting sustainable farming practices
- Strengthening food security and local economies
- Building long-term partnerships grounded in trust and shared growth

# OUR PRODUCTS

## MORINGA

We process moringa seeds into oil and moringa leaves into powder, capsules, tablets & tea, offering a range of health-boosting products rich in vitamins, minerals, and antioxidants.

MORINGA LEAVES
